Overview

The PI personnel expenses system refers to a system where a portion of a researcher ' s personnel expenses is allocated from the direct costs of competitive research funds obtained by the researcher as a principal investigator or collaborator. This system allows the initial employment funding thus generated to be utilized for the improvement of the researcher ' s own welfare and enhancement of the university ' s research capabilities.

At our university, based on the decision of the Inter-Ministerial Liaison Committee on Competitive Research Grants on October 9, 2020, regarding the " Expenditure of Principal Investigator ' s Personnel Expenses from the Direct Costs of Competitive Research Grants, " we have been implementing this system since AY 2021.
