

At Kyushu University, we have built accommodation for staff, in order to facilitate the efficient execution of work carried out by our directors and staff, and to contribute to the smooth operation of the University functions. The accommodation is provided to members of full-time staff at the University who fulfill certain conditions, as well as research fellows involved in large-scale research projects, and physicians and researchers working at the University hospitals. No deposit is required to enter the accommodation, but residents are required to return the property to its former state on leaving. Term of residency is 5 years (However, residents who meet the requirements can apply for an extension of their dormitory stay again after the initial term expires, but only once. This means the maximum possible residence period is 10 years, including the initial 5-year term.) For more details about the eligibility requirements, please contact the dormitory office at each department.

The following is an overview of the dormitories in Fukuoka City (excluding hospital dormitories) currently.
