

The budgets for Kyushu University as a national university corporation are the financial basis for the education, research, medical treatment, etc., carried out by the University.

In terms of the income budget of the University, the management expense grant and personal income account for significant portions of it. However, we are endeavoring to earn external funds such as income from academic research and industrial collaborations, since it is crucial for the development of education and research activities of the University. On the other hand, in terms of expenditures, operating expenses such as expenses for education and research as well as medical treatments account for a large portion of the total budget.
